#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 16 September 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-16, 27 and 29-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 27: there is no support for the new limitation that the channel is in the feeding source. The term "channel" occurs only once in the specification and that refers to channels in the fiber - therefore it does not appear possible that one could infer that the channel is in the feeding source.

There is no support for accelerating the preform as presently claimed in claim 1. Even further there is no support for "the preform accelerating the preform".

There is no support for the exit opening being down stream of the flow as required by claim 1. The term "downstream" isn't even in the specification. Thus there is no support for such. The only support is the support of original claim 1, i.e. where the pressure chamber is downstream of the flow.

There is no support for new claim 29. Claim 29 depends from claim 17. Claim 17 is directed to changing the circumference by compressing the fluid. The comments

indicate that page 5, paragraph [0015] has the support for new claim 29. Examiner does not agree, paragraph [0015] at best uses the "flow" of the glass to elongate change the circumference - as present claim 1 does - not compression. Furthermore, paragraph [0015] extrudes the material as a fiber - whereas present claim 29 extrudes the material first, and then latter forms the fiber by compression.

For each of the above items, Examiner made a reasonable attempt to find support for each. However, Examiner could not find any. The burden is now on Applicant to demonstrate that each was described in the specification in such a way as to reasonably convey to one skilled in the art that the inventors had possession of the claimed invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 7-8: there is no antecedent basis for "the preform accelerating the preform"

***Allowable Subject Matter***

Claims 17-21 are allowed.

***Response to Arguments***

***Response to Arguments***

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

As indicated above, the Response points out support for the addition to the claims - but such was not convincing.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
